

## St. Patrick Preschool Philosophy

Our preschool is a child-centered program designed to meet the individual needs of young children while helping them to know that they are the beloved children of God. The curriculum is based on learning through play and hands-on activities. The teacher guided social interactions in the classroom help to provide a foundation in which students will become independent problem solvers.

## Our Mission Statement

Our staff is committed to working with the parent community to provide a nurturing environment in which children will grow intellectually, spiritually, physically and socially.

## Student Qualifications

Children must be 3 or 4 by September 1 of intended school year and they must be potty trained.
